

Thematic Session

Session title: Topological Fixed Point Theory and Related Topics

Organizers:

Alexander Felshtyn, University of Szczecin, Poland, fels@wmf.univ.szczecin.pl

Jerzy Jezierski, Warsaw University of Life Sciences, Poland, jerzy_jezierski@sggw.pl

Ulrich Koschorke, University of Siegen, Germany, koschorke@mathematik.uni-siegen.de

Description of the topic:

The session will be devoted to recent advances in algebraic and differential topology with a strong focus on fixed points, periodic points and coincidences. Among possible applications: symplectic fixed points, Floer theory, dynamical systems and relations to Kervaire invariants.

Proposed speakers:

Robert Brown, University of California, Los Angeles, USA, rfb@math.ucla.edu

Karel Dekimpe, Katholieke Universiteit Leuven, Kulak, Belgium, Karel.Dekimpe@kuleuven-kortrijk.be

Davide Ferrario, University of Milano, Italy, davide.ferrario@unimib.it

Daciberg Goncalves, University of Sao Paulo, Brasil, dlgoncal@ime.usp.br

Michael Kelly, Loyola University, New Orleans, USA, kelly@loyno.edu

Boju Jiang, Beijing University, China, bjjiang@math.pku.edu.cn

Jong Bum Lee, Sogang University, Seoul, Korea, jlee@sogang.ac.kr

Takashi Matsuoka, Naruto University of Education, Japan, matsuoka@naruto-u.ac.jp

Peter Wong, Bates College, USA, pwong@bates.edu

Xuezhi Zhao, Capital Normal University, Beijing, China, zhaoxve@mail.cnu.edu.cn

2011 Mathematic Subject Classification:

55M20, 37C25, 37J10
